

MOBILITY FORWARD: ADVANCING TRANSPORTATION PRIORITIES – SCOPE OF WORK

INTRODUCTION

The Durham-Chapel Hill-Carrboro Metropolitan Planning Organization (DCHC MPO) receives a direct allocation for several sources of funding that the MPO has complete discretion over. As the Durham, NC urban area continues to grow at a rapid pace, it is essential that processes and tools keep up with transportation demand and ensure the advancement of high-quality, high impact projects in our community. The DCHC MPO's Federal Funding Policy, first adopted in 2019 and updated in 2023, outlines the procedures for an annual call for projects that will be managed locally in partnership with the North Carolina Department of Transportation (the Department). The DCHC MPO is seeking a consultant team to prepare a Mobility Forward—Mobility Forward: Advancing Transportation Priorities—for the DCHC MPO planning area (City of Durham, Durham County, portions of Orange County, Town of Chapel Hill, Town of Carrboro, Town of Hillsborough, and Northeast Chatham County), where the consultant team will help identify, affirm, and implement local project delivery strategies and action items, including creative and collaborative solutions to our federal funding policy and our most pressing local project delivery challenges. A desired outcome of this initiative is project benchmarking, web dashboards, and improved project sponsor update opportunities.

PROJECT OVERVIEW

The DCHC MPO *Mobility Forward* initiative will develop strategies to improve project delivery in the MPO area. This initiative is intended to assist our MPO, in partnership with our local jurisdictions and the North Carolina Department of Transportation (the Department), with obligating and delivering projects in our MPO area. *Mobility Forward* aims to conduct a comprehensive and stakeholder-driven process to ensure that our federal funds are allocated to feasible transportation projects that match community goals and are delivery-ready. This will include an intensive stakeholder analysis process to identify barriers and priorities; a Prioritization Analysis that examines our current process, criteria, scoring mechanisms, and more; the procurement of a new digital submission form tool that reduces burdensome tasks and provides robust analysis of project submissions; and engagement with the broader community, including local governments, transportation system users, partner agencies, community-based organizations, parallel climate and resilience planning efforts, and state entities.
