

# Triangle Transportation Choices Program

## FY22 Annual Impact Report Executive Summary

### What is TDM?

Transportation Demand Management (TDM) aims to reduce reliance on single-occupancy vehicles (SOV) for travel, by encouraging options such as **carpooling, vanpooling, public transit, biking, walking, teleworking, and flexible work weeks**. This Triangle Transportation Choices Annual Impact Report calculates the reductions in vehicle trips, vehicle miles traveled, and vehicle emissions resulting from programs funded by it during the 2021-2022 fiscal year (July 1, 2021 - June 30, 2022).

### AIMING FOR REDUCTION:

In the Triangle Regional 7-Year Long Range Travel Demand Management Plan, a goal of 25% reduction in growth of commute vehicle miles traveled (VMT) was set for 2015. Through the use of TDM programs and collaboration with local service providers (LSPs), that goal was met or exceeded each year, and continues to outpace the 25% target in 2022. The chart shown here illustrates the growth reduction from Fiscal Year 2012 through Fiscal Year 2022.

### HOW IT WORKS:

Triangle J Council of Governments serves as the administrator of the Triangle Transportation Choices Program that links state policy and funding with local and regional service providers. Funding is provided by NCDOT and Congestion Mitigation and Air Quality (CMAQ) Improvement Program on behalf of the two Triangle MPOs: CAMPO and DCHC MPO.

### IMPACTS OF TDM IN FY22:

	<b>5.1 million</b> vehicle trips avoided	That's over <b>88,000 days</b> not spent driving a car	
	<b>2.5 million</b> gallons of gas saved	It would take almost <b>299 tanker trucks</b> to hold that much gas	
	<b>64 million</b> commute miles reduced	That's roughly <b>22,000 trips</b> from San Francisco to New York	
	<b>51,000</b> alternative transportation users supported	If all those users drove single-file, the traffic jam would stretch <b>146 miles</b>	
	<b>49 million</b> pounds of Carbon dioxide (CO2) release prevented	That reduction would require <b>4,400 homes</b> not using electricity for a year	

### Annual VMT Reductions from 2012-2022
