These footnotes are to clarify the table data and will not be part of Amendment #2.

- (a) Reg. Sig. means Regionally Significant. Changes to these projects, e.g., deletion from the plan, could require a new air quality conformity determination.
- (b) Projects that are exempt may continue to move forward in the case of a plan lapse whereas non-exempt projects will not receive federal action until there is an approved MTP. In this column, exempt projects are indicated by the regulation section that provides the exemption, e.g., 93.126.

The large green letters at the header rows, e.g., A, B, ..., are for temporary reference purposes only and will not be part of Amendment #2.
