

Issues. These projects would add approximately \$21.3M in spending over the next several years on bus services and capital from the Durham Transit Tax Fund. This amount could affect the availability of funding for other major capital investments in the next 2-4 years. No particular project, if any, has been identified. Any major capital projects will come from the development of a new Transit Plan.

Development of the new Transit Plan will begin this summer. Initial community engagement for the new Transit Plan has shown a desire for improved bus service in Durham; further engagement is required to receive more specific input.

Alternatives. The DCHC MPO Board could choose not to approve the material change for any or all of the projects discussed in this memo.
