Pavement, Bridges and Travel Time Performance Measures and Targets (10 minutes) **Andy Henry, LPA Staff**

Federal regulations require the DCHC MPO to develop performance measures and targets for pavement, bridges and travel time on National Highway System (NHS) roads. The North Carolina Department of Transportation (NCDOT) established the performance measures and targets shown in the table on the attached resolution. The DCHC MPO will support the NCDOT measures and targets because the MPO must rely on NCDOT data and methodologies to calculate the values for the measures. This will be the first time the MPO has adopted these federal measures and targets.

TC Action: Review and discuss the pavement, bridge and travel time performance measures and targets, provide comments, and recommend that the MPO Board adopt the resolution.

Board Action: Review and discuss the pavement, bridge and travel time performance measures and targets, provide comments, and adopt the resolution to support the performance measures and targets.
